

### **Real-time Air Quality Monitoring Available in Superior, Colorado**

Using PurpleAir technology, the Town of Superior has three air quality sensors installed throughout the Town that provide real-time air quality monitoring. These monitors will make it possible for residents and visitors to view the potential risk from air pollution in order to make better decisions about spending time in the outdoors. The monitors have been installed at three locations around Superior including Town Hall, North Pool and South Pool. By visiting [www.purpleair.com/map](http://www.purpleair.com/map), anyone can see the air quality index in those locations as well as several other locations throughout the Denver metro area.

For more information on Air Quality Index, visit: <https://www.airnow.gov/aqi/aqi-basics/>
